TAMURA CORPORATION

## **Tamura's Iruma Factory Obtains IATF 16949:2016 Certification**

The Iruma Factory of the Tamura Corporation (President and Representative Director: Masahiro Asada) that manufactures automotive solder pastes has acquired "IATF 16949:2016" certification, which is an international quality management system certification for the automobile industry.

By establishing a system for maintaining and managing the quality required for the automobile industry, we are determined to continue improving quality and making other improvements so that we can be trusted to manufacture products for all customers including automobile manufacturers.

Issuing date : 2020-05-18

Scope : The design and manufacture of solder pastes.

Certificate registration no. : 50300922 IATF16

IATF No. : 0367930

Certification Authority : DQS Japan Inc.

\*IATF 16949 is an international quality management system standard for the automobile industry. It is used by many automobile manufacturers around the world, especially in Europe and the United States, as a global standard for the procurement of automobile parts. This standard of the IATF (International Automotive Task Force) for improving performance such as manufacturing processes, productivity, and cost in addition to quality assurance and customer satisfaction that are the purpose of ISO9001, is mainly intended for the development of quality management systems to prevent defects, eliminate variation and waste in the production processes of supply chains, and to make continuous improvements.
