Tamura Corporation

Construction of New Production Facility for Solder Powder in Sayama site

Tamura Corporation (Tokyo, Japan) announces that it has decided to construct new production facility in Sayama site, which is one of the production sites of Electronic Chemicals/FA Systems Business Sector, in Saitama Prefecture, Japan.

The major business activities of Electronic Chemicals/FA Systems Business Sector are carried out at Iruma site, Sayama site and Kodama factory in Saitama Prefecture, Japan. Given the age of the building at Iruma, Tamura has decided to construct a new building at and move production and testing equipment of solder powder to the Sayama site. The relocation would ensure the production efficiency improvement, as well as the contribution to environment protection and enhance energy efficiency of the site and plant.

The planned capital expenditure is estimated to be JPY5 billion, and the completion of the new building is slated for October 2025.

Tamura Group is transforming itself in order to lay a solid foundation for future, the 100th anniversary in 2024 and beyond, in accordance with its 13th Medium-term Management Plan, "Energize the Future 100". This relocation will enhance the strength of Electronic Chemicals and FA Systems Business as well as contribute to the environmental protection and contribution to decarbonized society, a key initiative under its Sustainability strategy.

Sayama Site (Aerial Photo)

Conceptual Drawing of New Production Facility
